

## QUALITY POLICY

Our objective is to give utmost satisfaction to the client through provide quality construction “each time...every time...”

We always try to meet customer requirements with respect to quality of construction while constructing and handing over the project.

We have our own quality procedure and we strict to ISO standard. We are fully committed to provide quality construction and continuously improving the effectiveness of our quality standards.

To achieve excellent quality we follow...

- Top management directly involve in quality related decision.
- Establish lab set-up at site.
- Innovation and enhancement in construction methodology.
- Provide continuous training to our staff and workers to improve quality standards.
- Well defined work instructions for each activity
- Full proof checking system established before each activity start.
